Introduction to Exchange Traded Funds (ETFs)

An Exchange Traded Fund (ETF) is primarily a mutual fund scheme which is listed and traded on a stock exchange. An ETF can invest in:

- ❑ Equities – replicating the composition and performance of an equity index (e.g. Nifty 50 Index, Nifty Next 50 Index)
- ❑ Commodities – tracking the actual price of a commodity (e.g. Gold)
- ❑ Money market instruments – which include short-term government securities and call money
- ❑ Debt Instruments - Government securities with long maturity

Nifty CPSE Index

Constituents of the Nifty CPSE Index

About the Nifty CPSE Index

Nifty CPSE Index is constructed in order to facilitate Government of India initiative to disinvest some of its stake in selected CPSEs (Central Public Sector Enterprises) through the ETF route. The index values are to be calculated on free float market capitalization methodology. The index has base date of 01-Jan-2009 and base value of 1000. Weights of index constituent shall be re-aligned (i.e. capped at 25%) every quarter effective 2nd Monday of February, May, August and November.

Selection Criteria: The 10 CPSE's selected meet below mentioned parameters:

- ❑ Included in the list of CPSEs published by the Department of Public Enterprise
- ❑ Listed at National Stock Exchange of India Ltd. (NSE)
- ❑ Having more than 55% government holding (stake via Govt. of India or President of India) under promoter category.
- ❑ Companies having average free float market capitalization of more than Rs.1000 Cr. for six month period ending June 2013 are selected.
- ❑ Have paid dividend of not less than four per cent including bonus for the seven years immediately preceding or for at least seven out of the eight or nine years immediately preceding are considered as eligible companies as on cut-off date i.e. 28-Jun-2013.

CPSE ETF – Scheme Details

❑ Investment objective

The investment objective of the Scheme is to provide returns that, before expenses, closely correspond to the total returns of the Securities as represented by the Nifty CPSE Index, by investing in the Securities which are constituents of the Nifty CPSE Index in the same proportion as in the Index. However the performance of the Scheme may differ from that of underlying index due to tracking error. There can be no assurance or guarantee that the investment objective of the Scheme would be achieved.

❑ Investment pattern

Instruments	Indicative Allocation (% of net assets)		Risk Profile
	Minimum	Maximum	
Securities covered by Nifty CPSE Index	95%	100%	Medium to High
Money Market Instruments (with maturity not exceeding 91 days), including CBLO, cash & cash equivalents.	0%	5%	Low to Medium

The above stated percentages are indicative and not absolute.

❑ Type of scheme

An Open Ended Index Scheme, listed on the Exchanges in the form of an Exchange Traded Fund (ETF) tracking Nifty CPSE Index

❑ RGESS

The Scheme is in compliance with the provisions of Rajiv Gandhi Equity Savings Scheme, 2013 ('RGESS')

Disclaimers

Scheme Specific Risk Factors: Risk relating to CPSE Securities - Since the CPSE companies are substantially owned by the GOI, the GOI may take actions with respect to the CPSE sector that may not be in the best interests of Unit holders. There can be no assurance that such incidents would not result in a fall in price of the underlying securities constituting the Nifty CPSE Index and correspondingly the NAV of the Scheme. Further trading volumes and settlement periods may restrict liquidity in equity and debt investments. Investment in Debt is subject to price, credit, and interest rate risk. The NAV of the Scheme may be affected, inter alia, by changes in the market conditions, interest rates, trading volumes, settlement periods and transfer procedures. The NAV may also be subjected to risk associated with tracking error, investment in derivatives or script lending as may be permissible by the Scheme Information Document (SID). For further details please refer SID
